

# Gilding Copper with 23 Karat Gold

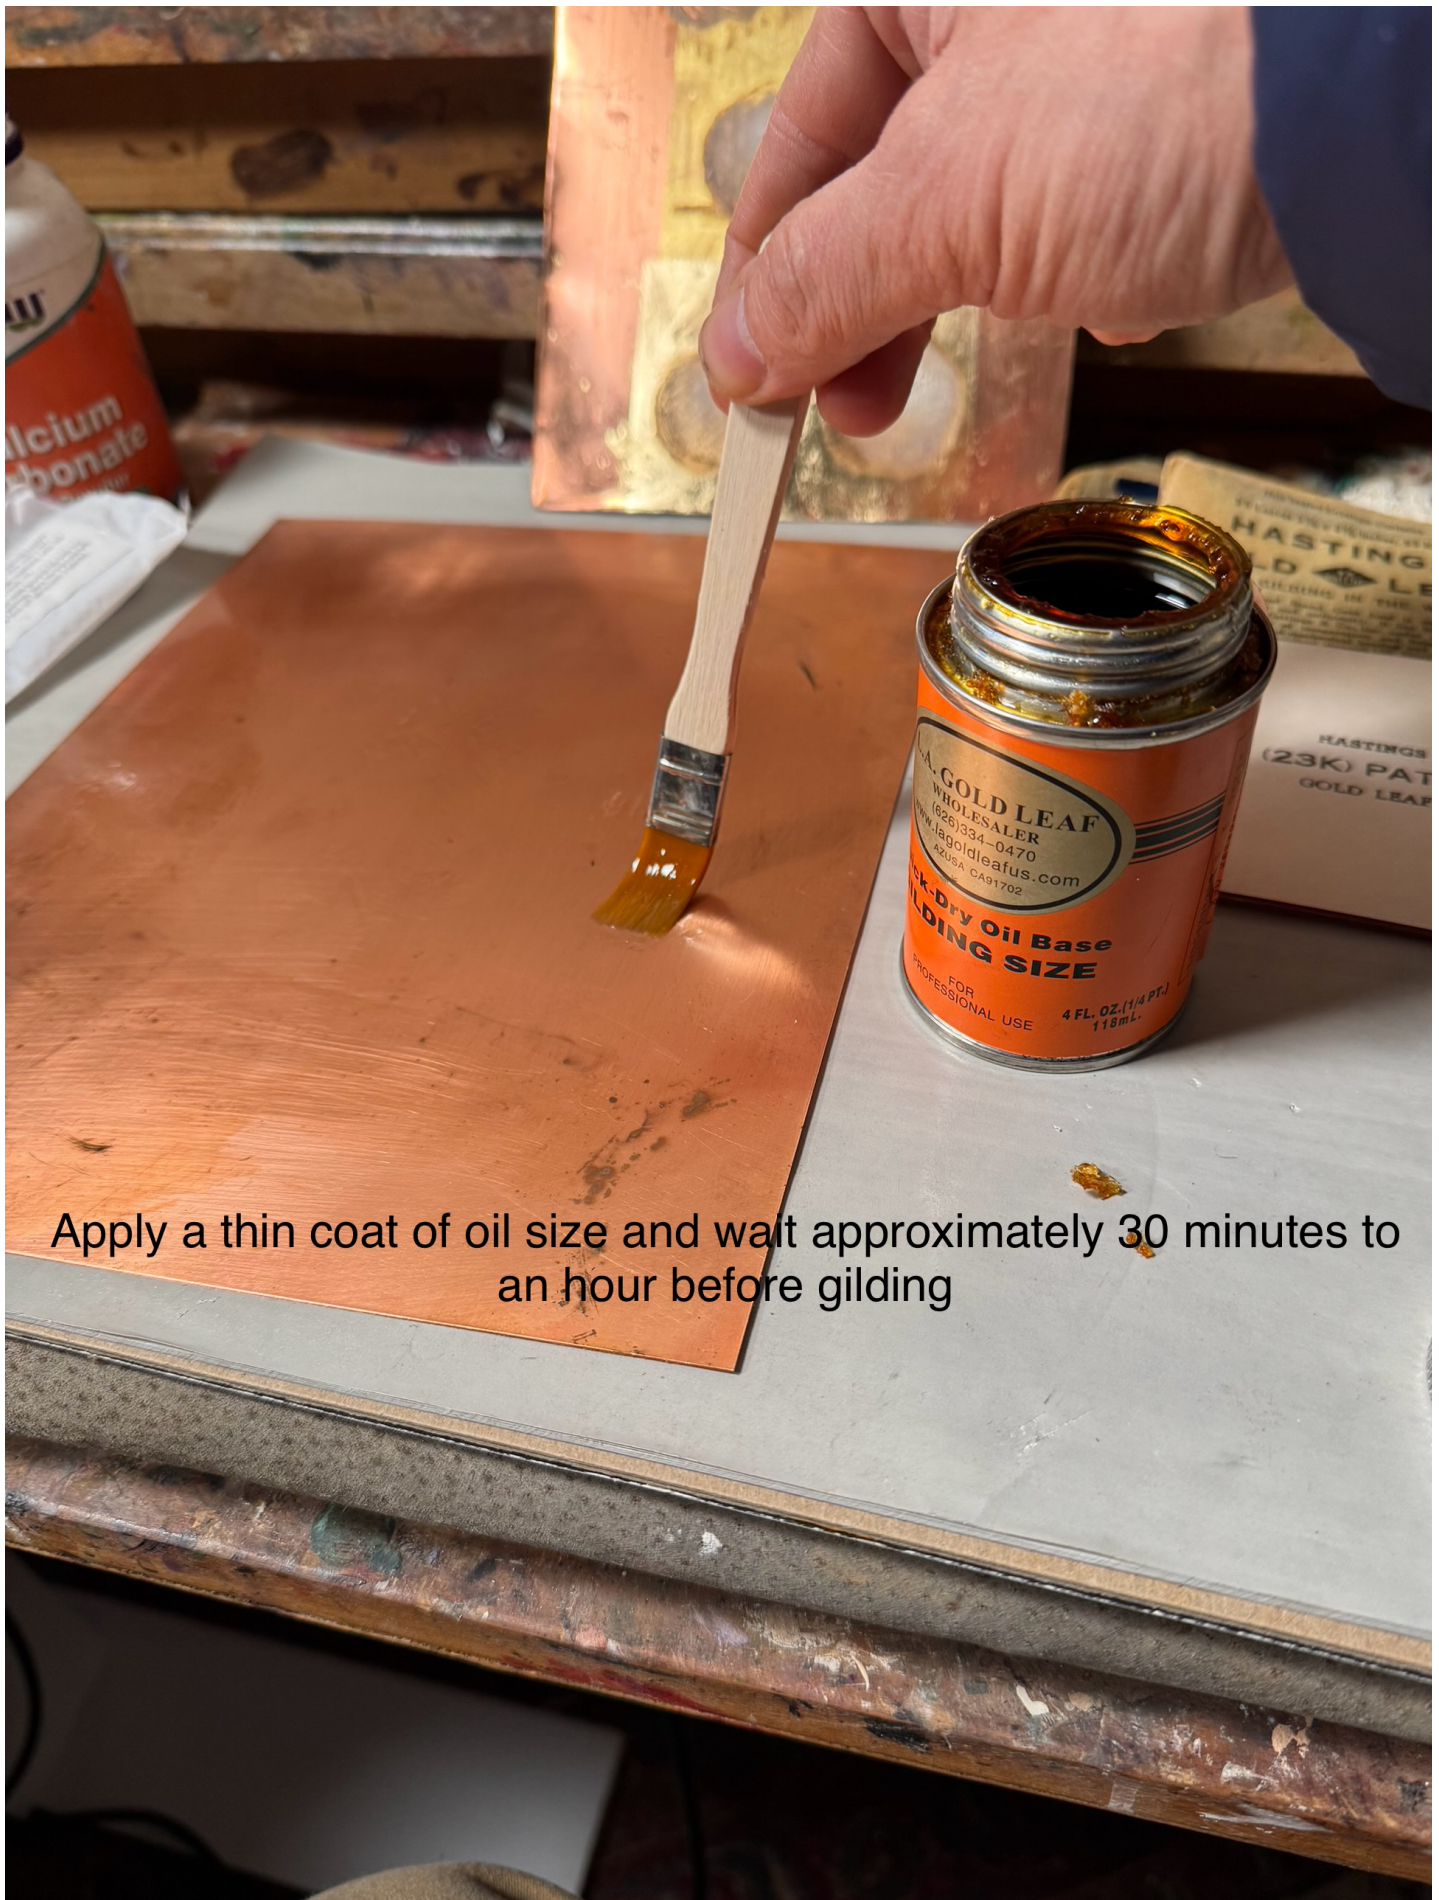

24 Gauge Copper Plate

Brush

Quick Dry Oil Size

23k Gold

Apply a thin coat of oil size and wait approximately 30 minutes to an hour before gilding

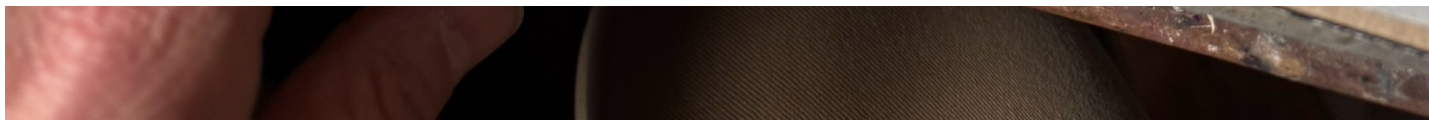

The Gold I am using is called “patent” gold which is intended for oil gilding and is typically used for outdoor gilding projects

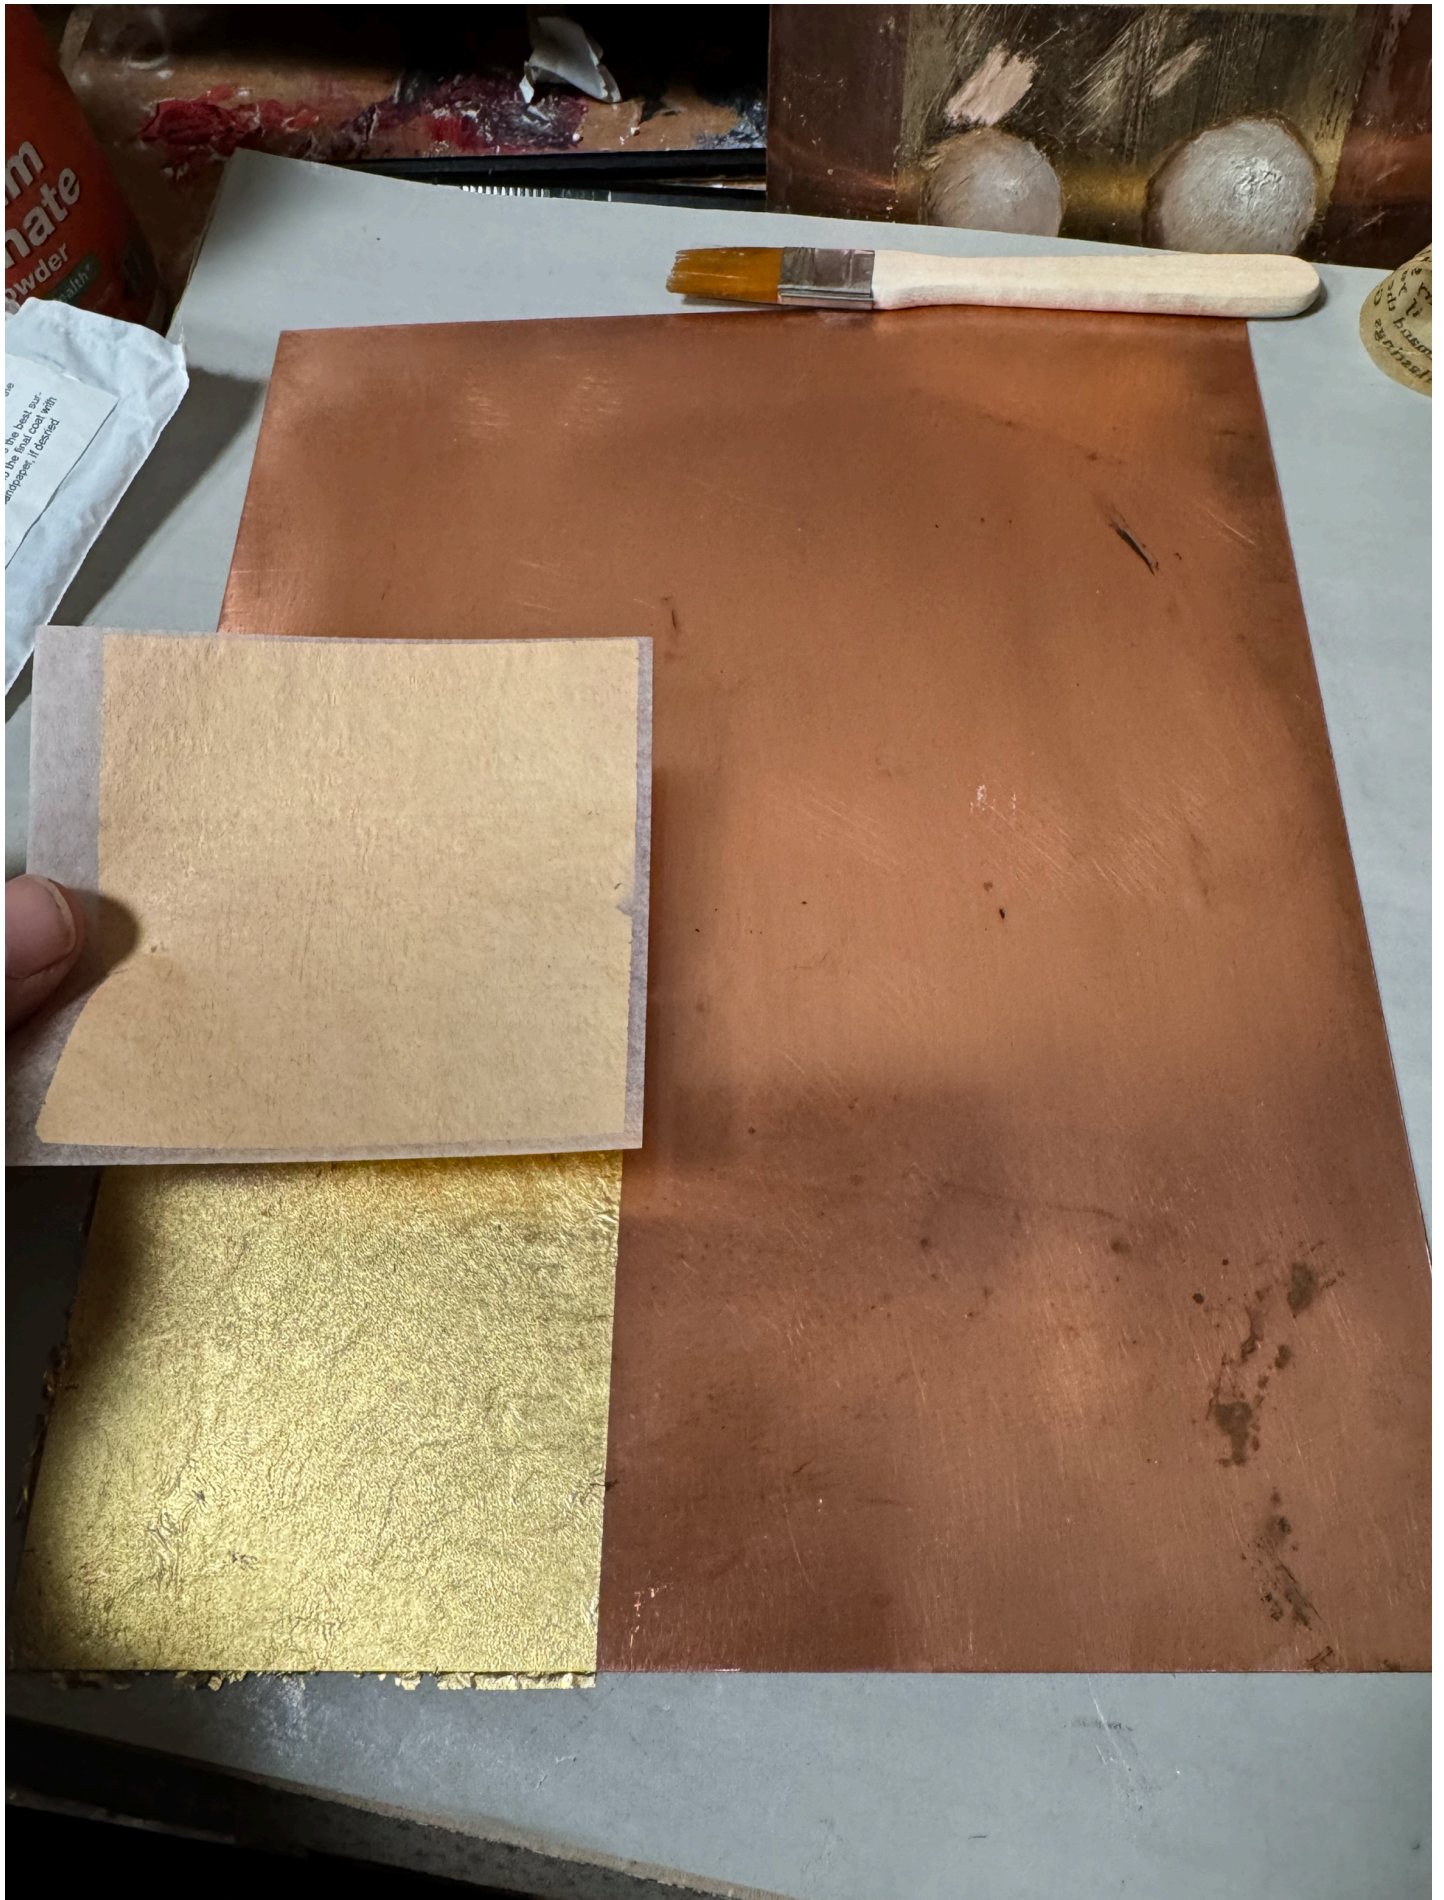

The gold is attached to paper sheets which allows for easy application to flat surfaces

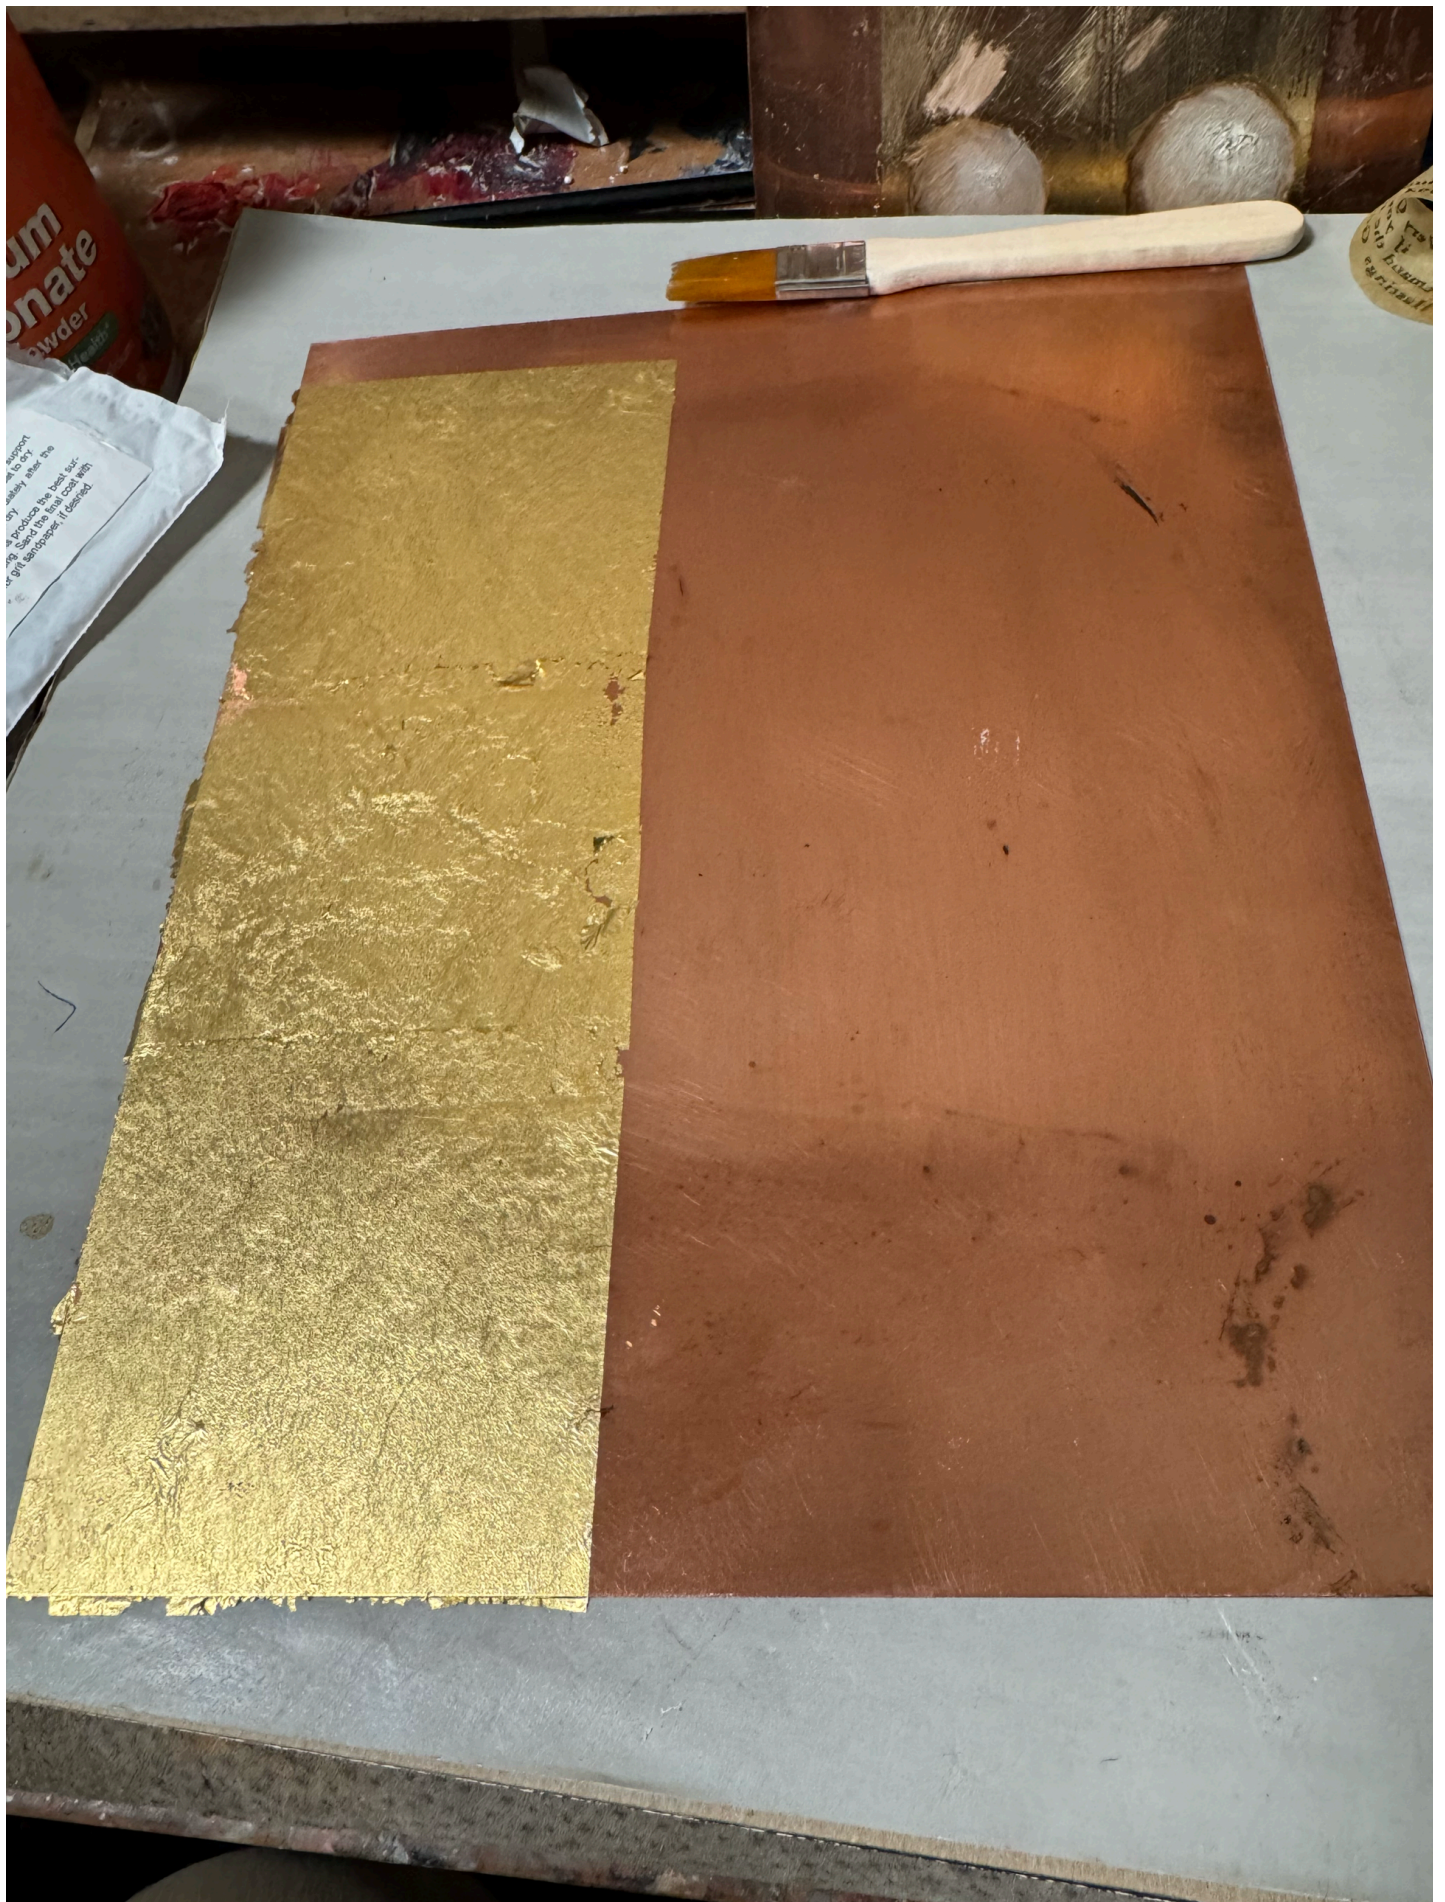

---

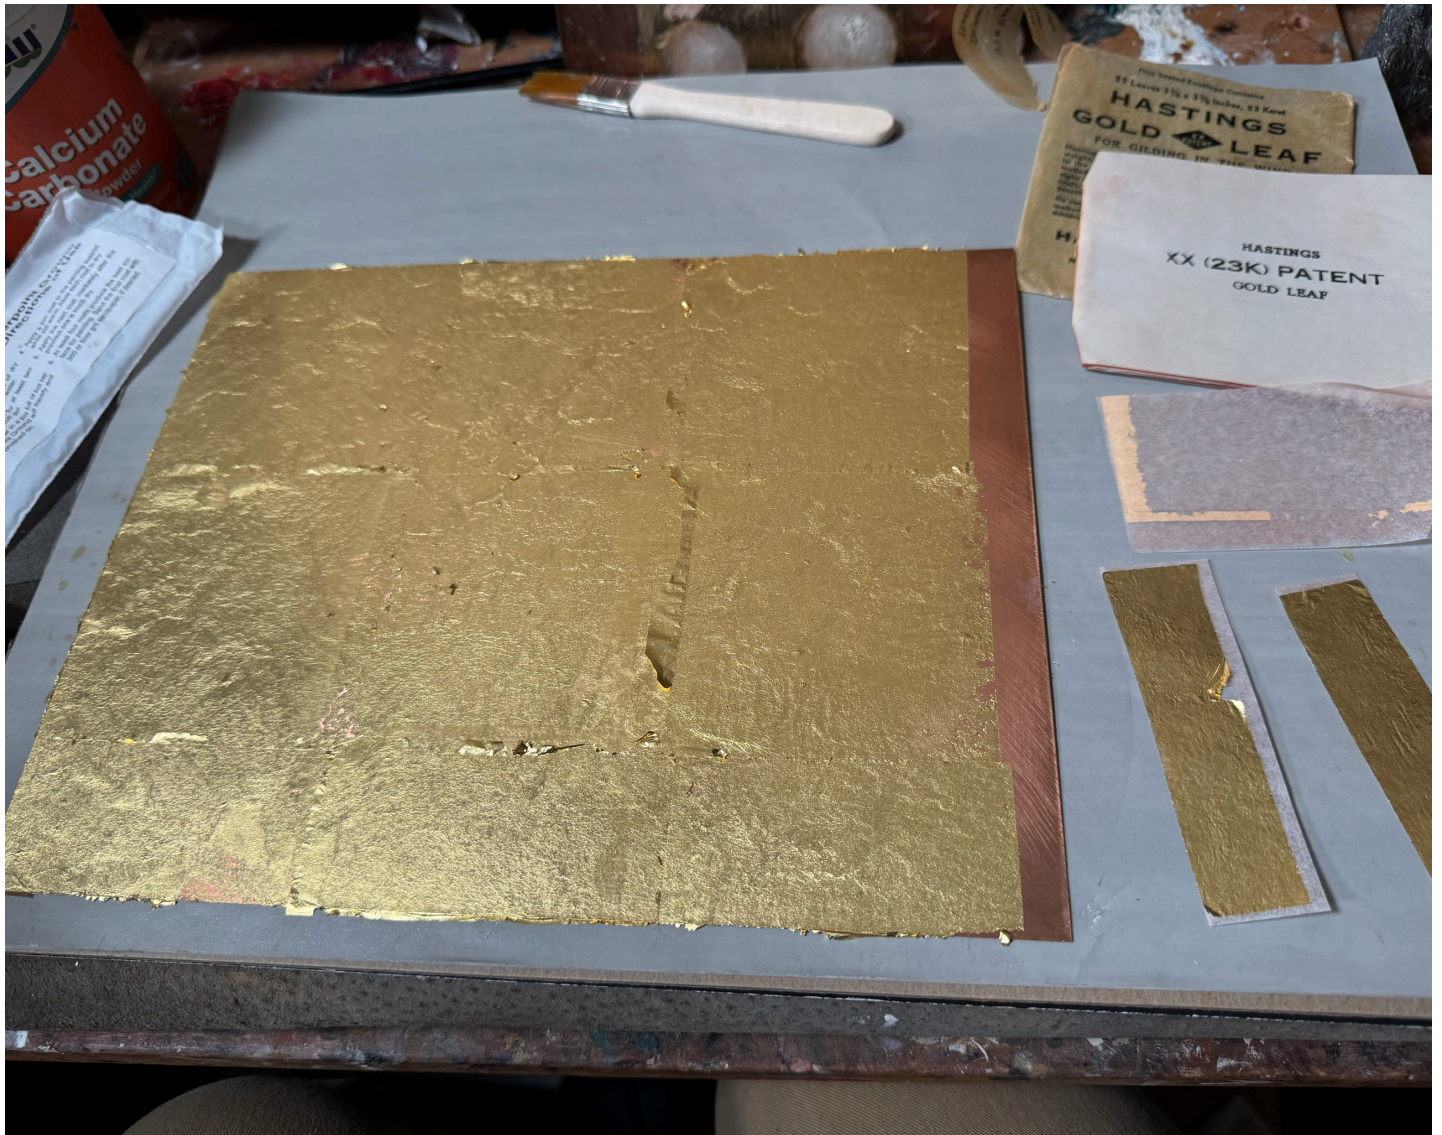

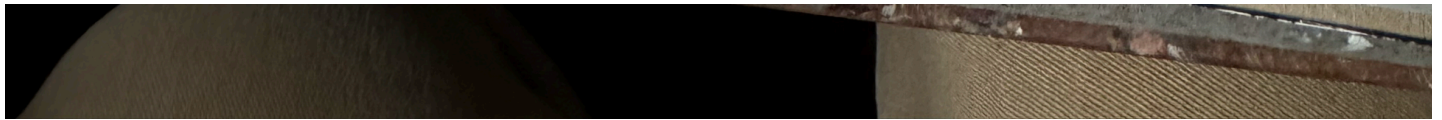

After the size has dried completely the surface is cleaned up with a ball of soft cotton

Ready for gilding
